

```
// Hello, I'm Jess
```

I live in **South Africa** and love **science**, **tech**, **art** and **nature**. I studied at the **University of Pretoria** and completed my **B.Com** degree in 2016 and am currently pursuing excellence in data science, design and visualisation.

```
function work() {
  I work remotely as a software
  product executive at Merge Digital
  and work on projects for fun at
  The Bit Foundry.
}
```

```
function play() {
  Games were something that peaked
  my interest in tech and ultimately
  lead me down the path that I'm on.
  I don't play much but I am super
  passionate about the creator
  community, tools and gamification
  of work in general. Currently,
  Decentraland is peaking my
  interest and I feel as though I'm
  playing DayZ in real life,
  #Covid19
}
```

```
function create() {
  I love be able to create, build
  and improve products, designs, and
  systems and thrive in high-growth
  environments. Besides coding, I
  enjoy music, art and painting.
}
```

```
function learn() {
```

```
// Tech skills
```

Tools and frameworks I am using at the moment...

```
var skills = {
  "CSS",
  "JavaScript",
  "TypeScript",
  "VueJS",
  "Angular",
  "Bootstrap"
  "MySQL",
  "Python",
};
```

```
// Connect with me
```

Socials and contact details...

```
/**
 * 📝 Blog { tech, data, art and
  design musing }
 * 📷 Instagram { photography, travel,
  art && things }
 * ✉️ Email { work and collaboration
  enquiries }
 * 🐙 GitHub { code, open-source
  projects && things }
 * 💼 LinkedIn { professional connect
  }
 * 🐦 Twitter { some opinions, mostly
  questions }
 * 🎨 Behance { digital artistry }
 * 🏠 Dribbble { yet another platform
  }
```

```
I believe in life-long learning
and am passionate about how data
impacts enterprise and the
individual, and the interface of
machine, and biological
intelligence.
}
```

```
**/
```
